# Tweaks für das Dell Inspiron 14 Notebook

## Ubuntu 14.04 "Kein Akku vorhanden"

Simply add the option `acpi_osi=Linux` to your GRUB commandline.

To make this a permanent solution you can edit the file `/etc/default/grub` and append the option to the line

```
GRUB_CMDLINE_LINUX_DEFAULT="quiet splash"
```

so that it looks like this:

```
GRUB_CMDLINE_LINUX_DEFAULT="quiet splash acpi_osi=Linux"
```

Don't forget to run `update-grub2` to regenerate the grub menu.
