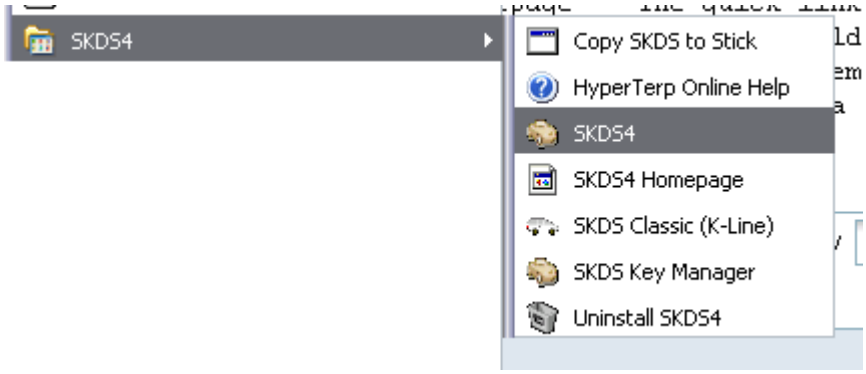
SKDS Pack Content 3

SKDS Pack Content



SKDS comes with several tools, which are accessible from the SKDS-Menu on your program start bar.

These tools are:

- **Copy SKDS to Stick** This allows all required files to be copied e.g. onto a memory stick to always have SKDS available in your pocket.
- **Hyperterp Online Help** The documentation of the build-in script language of SKDS
- **SKDS3** The main program.
- **SKDS Homepage** The quick link to the SKDS-Homepage.
- **SKDS Classic (K-Line)** An older version of SKDS, partly updated, to work with modules which are connected via a serial link (K-Line).
- **Uninstall SKDS4** This will remove the SKDS installation again from your disk.
- **SKDS Key Manager** The tool to generate your personal key set and to translate encrypted script files to other users
