## File Types

Internally SKDS deals with 3 different types of files. To handle these several types correctly during file-handling operations, here is a short description of the meanings:

- \* **.SCS** This file stores the encrypted Script-File. It has been generated from a ASCII Script file through the SKDSC-Compiler
- \* **.HTP or .PAS** This is the clear text Script-file in readable ASCII- Text. It contains the program functions and also the main table structure and works as the input for the SKDS-Compiler skdsc
- \* **.skdspubkey** This contains the public key of a user
- \* **.skdsseckey** This contains the password protected private (secret) key of a user

## System Requirements:

Vector- Electronic © CanCardX © Driver and HardwareIntel ©

Pentium © processor

Microsoft © Windows © 95 OSR 2.0, Windows 98 SE, Windows Millennium, Windows NT © 4.0 with Service Pack 5, Windows 2000 or Windows XP, Windows Vista, Windows 7
