TheSign: Technique & Security

Why another GPG Signature Tool?

There are already tons of signature programs available, so why write another one?

- to keep it as simple as possible only for one specific need
- theSign don't need a installation, it's especially designed to run e.g. from a USB- stick

What's GPG?

GPG itself is a very powerful but also very complex tool chain.

To keep it simple, this pages will only focus on what is really need to know to use TheSign.

About GPG itself there are thousands of webpages all over the world. One starting point could be the [GPG homepage](#) itself or the [german Wikipedia page](#)

External TheSign Links:

- Sourcecode repository at <http://thesign.googlecode.com>
- The TheSign [BugTracker](#) for error reporting & feature requests
